EXPERIENCE

CapTech , Charlotte, North Carolina • Consultant   (04/2025-Present)

- At a Fortune 500 Financial Services Company:
- As a React Frontend Developer:
    - Rebuilt an application that was the client's enterprise administration tool.
    - Integrated 15 React-Typescript based components that adhered to the design standards set by the company's design system.
    - Scheduling consultation meetings with the client's UX designer to coordinate design improvements and changes to increase interface integration.
- Provides technical support to integrate React-Typescript components for an internal component library used by company's internal and external projects.

TIAA , Charlotte, North Carolina • Developer   (01/2025-04/2025)

- Developed responsive React application that provides edit, uploading, deleting documents to allow users to provide questions against 200+ KDP points predefined in uploaded documents that are sourced to predefined prompts in prompt engineering system.
- Integrated 4 Python-based Rest APIs that serve dynamically built UI for the user based on filtering options made on the UI via form submission or dropdown selection within a form.

Rotational Program

TIAA, Charlotte, North Carolina

Frontend Developer & UI/UX Designer   (07/2024-01/2025)

- Integrated 3 responsive UI applications via Figma resulting in a 10-member development team being able to provide deployed React Typescript applications that support 100+ internal users within the required Q4 deadline.

React Developer   (01/2024-07/2024)

- Developed 3 React-Typescript components, Chips, Button Toggle and Tabs that I provided sample code via Storybook for 50+ other development application teams to use in their own Next.js applications that the components intended for.

QA & RPA Developer   *(07/2023-01/2024)*

- Executed ETL automation tool to run cross count test against 1000+ rows of data extracts from Oracle Database.
- Created a Python script that runs queries from a 1000 record database and saves the results in an excel sheet.
- Developed an Email Automation system via Power Automate that extracts an excel from an email runs a Office script to complete calculations across 5 fields of 100+ records, save the output to new excel and send it as email to the original user.

Data Analyst   *(01/2023-07/2023)*

- Integrated 3 Power BI dashboards with conditional style formatting based on 50+ columns, filtering and drillthrough option to provide more details on selected data points.
- Developed a Power Apps application that utilizes Microsoft 365 data connection to showcase 8 corporate leaders' team's goals and quarterly achievements.

TIAA , Charlotte, North Carolina • Intern   *(06/2022) - (08/2022)*

- Integrated interactive Power BI dashboard that analyzes data from ServiceNow.
- Worked with a 5+ team to create a web application for a company-wide tech hackathon.
