WORK EXPERIENCE

CapTech

April 2025 – February 2026

Software Engineer

Charlotte, NC

As a Software Engineer that specialized in frontend development it was aligned to refactor legacy enterprise admin portal to be modernized using React Typescript and integrate Spring Boot backend REST APIs.

- Leveraged the company's design system, created 20 reusable React-Typescript components that reduced duplicate UI code and accelerated feature delivery by 70% across the team.
- Utilize AI Copilot to increase frontend application rebuild process by 50% to improve application durability and accessibility.
- Integrated 16 SpringBoot REST apis to streamline data flow and improve user experience across key application workflows and increased application load by 80%.

TIAA

January 2025 - April 2025

Developer

Charlotte, NC

- Developed responsive document management UI supporting 200+ data points, enabling users to upload, edit, and query documents through AI-driven interface.
- Integrated 4 Python-based Rest APIs that serve dynamically built UI for the user based on filtering options made on the UI via form submission that leveraged the application's completion to be 80% finished.

TIAA

January 2023 - January 2025

Frontend Developer

Charlotte, NC

- Redesigned and improved the legacy UI interfaces of 3 web applications with Figma and as a result were able to alleviate from using old interfaces written only with HTML and Pearl scripting language and increase web loading by 80%.
- Built updated versions of 2 legacy web applications that were able to provide 100+ internal users with quick browser experience with old legacy versions of the applications.

React Developer

Charlotte, NC

- Integrated Tabs and Button Toggle React-Typescript components that then were tested for usability with Playwright that were able to be used across the 100+ teams in the organization.
- Served as a consultant to prospective and active teams that were to incorporate the components. I was able to help the Identity Management Team to utilize 10 components across 3 redesigned web applications that leverage team productivity to 90%.

QA & RPA Developer

Charlotte, NC

- Created a Python script that runs queries from a 1000 record database and saves the results in an Excel sheet.
- Developed an Email Automation system via Power Automate that extracts an Excel from an email runs an Office script to complete calculations across 5 fields of 100+ records, save the output to new excel and send it as email to the original user.

Data Analyst

As a Data Analyst, created BI visualizations to present historical data of the Global Infrastructure Services headcount and technology equipment shelf lifes.

- Integrated 3 Power BI dashboards with conditional style formatting based on 50+ columns, filtering and drillthrough option to provide more details on selected data points.
- Developed a Power Apps application that utilizes Microsoft 365 data connection to showcase 8 corporate leaders' team's goals and quarterly achievements that were able to effectively plan for new goals quarterly.
